

Day	Topics	Description	Exercise + Sample Code
1	Testing Basics	SDLC, STLC	Write 5 testing examples
2	Testing Types	Functional vs Non-functional	Classify scenarios
3	Test Cases	Write test cases	Create login test steps
4	Agile	Scrum basics	Convert story → test cases
5	BDD Intro	BDD basics	Write Given–When–Then
6	BDD Concepts	TDD vs BDD	Write 3 scenarios
7	Practice	BDD writing	Login failure scenario
8	Gherkin Basics	Feature/Scenario	Write 2 features
9	Steps	Given/When/Then	Fix bad steps
10	And/But	Improve readability	Add And steps
11	Scenario Outline	Data-driven	Use Examples table
12	Background	Reusable setup	Add Background
13	Tables	Structured data	Create user table
14	Practice	Feature files	Login + Signup
15	Behave Setup	Install behave	pip install behave
16	Run Test	Execute test	Run behave command
17	Steps Code	Step definitions	Write @given step
18	Context	Data sharing	Use context variable
19	Assertions	Validate results	Use assert
20	Parameters	Data passing	Use ""
21	Practice	Logic test	Build login validation
22	Hooks	Setup/teardown	before_scenario()
23	Tags	Filter tests	Use @smoke
24	Tables Code	Parse data	Loop table rows
25	Outline Code	Reuse scenarios	Map examples
26	Environment	Config setup	Create environment.py
27	Debugging	Fix issues	Print logs
28	Practice	Mini framework	Login flow automation
29	Selenium Setup	Install Selenium	pip install selenium
30	Browser	Open site	driver.get(URL)
31	Locators	Find elements	ID, XPath
32	Actions	Click/input	.click(), send_keys()
33	Waits	Synchronization	WebDriverWait
34	UI Handling	Alerts/dropdowns	Handle popup
35	Practice	UI automation	Login script
36	Integration	Behave + Selenium	context.driver
37	Driver Use	Reuse browser	driver in steps
38	POM	Page model	class LoginPage
39	Classes	Reusable methods	Add methods
40	UI Assert	Validate UI	assert title
41	Screenshot	Capture errors	save_screenshot
42	Practice	UI BDD	Login + cart
43	API Basics	REST methods	List HTTP verbs
44	Requests	Install library	pip install requests

45	API Calls	GET/POST	requests.get()
46	JSON	Parse response	.json()
47	Validation	Status check	== 200
48	Auth	Authentication	Add headers
49	Practice	API script	CRUD APIs
50	BDD API	Combine tools	behave + requests
51	Logging	Logs	logging.info
52	Reports	Generate report	Allure/basic
53	Test Data	CSV/JSON	Read files
54	Framework	Structure	Create folders
55	Git	Version control	git init
56	Final Project	Full system	UI + API BDD
